

Professor Ernst Theodor Rippmann's visit to OGASH Multiprofile International Scientific Research Laboratory "ALFAMED" named after Dr. Rippmann was of the great importance to the management and the whole staff. "ALFAMED" is the first laboratory in the territory of Georgia which methods and work style Prof. Rippmann, honored scientist, Secretary General and Patriarch of the Organisation Gestosis have been interested in. Therefore it fell on the laboratory to work under the name of the Patriarch of the Organisation Gestosis and under its aigies to become a multiple discipline research laboratory, cooperating with WORLD OGASH BOARD. We are more than sure that this cooperation promises rapid progress in the world telemedicine as well as introduction of the new methods and raising the doctors competency.
